SUPPLY DIVISION WEEKLY REPORT

PERIOD ENDING 14 JUNE 1983

I. Progress Report on Tasks Assigned by the DCI/DDCI:

Negative.

II. Items or Events of Major Interest that have Occurred During the Preceding Week:Test Electronic Requisitioning

Supply Division and the Office of Communications (OC) are prepared to implement phase I of the test of electronic requisitioning utilizing existing ICS capabilities. The Systems Analysis Branch/P&PS has been tasked to make appropriate programming modifications to allow OC limited access to ICS. As a result of higher SAB priorities, the C/P&PS authorized forty hours of overtime to complete the software modification to support this initiative. SAB projects a mid-July completion date for the programming changes. (Author:)

ICS File Clean-Up

In an attempt to clean out some of the older records in the Inventory Control System (ICS), Supply Management Branch has continued to initiate system searches which reveal anomalies in data present in the ICS. One recent effort targeted on OTS Allocation 61 showed that a total of 22 stock numbers had a larger quantity of items on back order than the total quantity on hand and on order. As a result, SMB sent a memorandum to OTS which explained the problem and requested their assistance in resolving the inconsistencies in our data. OTS responded by canceling seven of the items and verified that the other 15 were valid requirements for the total number of items on back order. OTS subsequently either made adjustments to total quantities or took action to process replenishment requisitions for the remainder of the requirement. (Author:)

14 June 1983

ICS Clean-Up - CPB Actions

Research on the "Missed Due In" computer run of CPB actions (present in ICS Suspense for FY-81 through March, FY-83) has resulted in a decrease of records from 138 to 48. Research continues on this report as well as the "No-PIN" computer run which contains 754 records for research (covering FY-79 through March, FY-83). (Author:)
